

# **QX-Series** LED-backlit Display 55" | 43" | 32" | 28" | 24"

The QX-Series multi-screen capable UHD displays are designed for demanding surveillance and digital signage applications. Multi-screen viewing enables simultaneous display of multiple signals with up to 4 split screens. In addition to simplifying hardware setup by enabling the use of one display in place of four 1080p monitors, the QX-Series provides the gain in clarity required for real-time and up-close monitoring in traffic management centres, casinos, emergency operations centres and other public installations.

<sup>\*</sup> Stands are included with 24" and 28" models only.

## Experience the 4K Difference

Don't miss a single detail with this powerful 4K display. View smooth 4K video and graphics with a new level of detail and clarity. Offering 8.3 million pixels, the QX-Series provides sufficient resolution for even the most demanding surveillance and digital signage applications.

## **Easy Control and Integration**

Its built-in RS-232 and Ethernet control capabilities make the QX-Series easy to control and integration a breeze. Whether it is a local serial management connection or a remote network installation, the QX-Series can be managed in multiple scenarios and applications.

#### Multi-Screen Viewer

With the Picture-by-Picture (PbP) feature and up to four inputs, you can display four full-resolution (unscaled) 1080p windows on a single display. This delivers four-quadrant viewing at crisp, true Full HD, a significant visual gain over the lower qHD (960x540) resolution delivered when a 1080p display is divided four ways.

## **Industry-leading Reliability**

Designed for 24/7 operation, these durable metal-housed displays protected with NeoV<sup>TM</sup> Optical Glass take advantage of superior components to ensure a long product lifetime. Its integrated HeatControl sensors automatically activate the internal cooling fans, which is crucial when the temperature rises in mission-critical installations.

#### **Features**

- LED-backlit technology with 3840 x 2160 UHD resolution
- Versatile connectivity: DisplayPort, HDMI, DVI, VGA
- NeoV<sup>™</sup> Optical Glass and Anti-Burn-in<sup>™</sup> technology
- PIP/PBP function enables simultaneous multi-source viewing
- RS-232 and RJ45 for display control from a remote location
- Premium-grade panel for high reliability and long product lifetime
- EcoSmart sensor detects ambient lighting conditions and automatically adjusts the brightness levels to reduce power consumption
- HeatControl sensors automatically activate the internal cooling fans (32", 43", 55" only)
- Ergonomically designed stand: tilt, pivot, swivel, height adjustable for multiple viewing options (24" and 28" only)
- Flexible display orientation: Landscape/ Portrait
- Kensington Security Slot™ (24 and 28" only)
- VESA standard wall mount compatible
- Built-in speakers
- Durable metal casing
